

GEORGIOS KARAMOUSALIS

JUNIOR SOFTWARE ENGINEER | JAVA & BACKEND DEVELOPMENT

Patras, Greece | Open to remote opportunities

[Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFILE

Computer Science graduate and MSc Artificial Intelligence candidate focused on Java backend and full-stack engineering. Builds secure REST APIs and production-style applications with Spring Boot, React, SQL, Docker, automated testing and CI/CD. Brings operational discipline, customer awareness and research-led problem solving.

TECHNICAL SKILLS

Programming: Java, Python, TypeScript, JavaScript, SQL | Backend: Spring Boot, FastAPI, Node.js, Express, REST APIs, JWT, JPA/Hibernate, Flyway, OpenAPI | Frontend: React, Vite, HTML, CSS | Data & AI: PyTorch, Hugging Face Transformers, scikit-learn, pandas, NetworkX | Platform & Quality: PostgreSQL, MySQL, MariaDB, Redis, Kafka/Redpanda, Docker, GitHub Actions, JUnit, Pytest, Selenium, Git

EDUCATION

MSc Artificial Intelligence | In progress

Focus: deep learning, natural language processing, model evaluation and applied machine learning research.

BSc Computer Science | Metropolitan College, Athens, Greece | 2022 - September 2025

Coursework included software engineering, databases, distributed systems, web development, data analysis and artificial intelligence.

SELECTED PROJECTS

ResolveHub - Support Ticket & SLA Platform | Java 21, Spring Boot, React, PostgreSQL | [GitHub](#) | [Live Demo](#)

- Designed a ticket management platform with JWT-based role access, validated workflows, SLA deadlines, activity history, search, filtering and operational dashboard metrics.
- Integrated Flyway, Kafka-compatible events with Redpanda, Swagger/OpenAPI, Actuator, JUnit/MockMvc, React/TypeScript, Docker Compose and GitHub Actions CI/CD; delivered an interactive public demo.

Stance Detection with Deep Learning | MSc Thesis in Progress

- Developing a reproducible three-class NLP pipeline for FAVOR, AGAINST and NEUTRAL stance detection using TF-IDF baselines and transformer models on VAST and EZ-STANCE datasets.
- Implementing training, validation, checkpoint selection, error analysis, confusion matrices and a local Streamlit demonstration; work remains in progress.

Restaurant Reservation App | React, Node.js, Express, MariaDB

- Built user registration, JWT login, restaurant discovery and reservation-management flows backed by REST endpoints and relational persistence.
- Documented the API with a Postman collection and supplied database setup instructions and sample data for repeatable local use.

Social Network Analysis for Influencer Detection | BSc Thesis

- Used Python, NetworkX and Gephi with PageRank, centrality and community-detection techniques to identify influential actors and translate graph metrics into interpretable findings.

EXPERIENCE

Expenditure and Supply Office | Hellenic Army | September 2025 - June 2026

- Supported expense records, supply documentation and administrative workflows requiring accuracy, organization, confidentiality and dependable delivery under deadlines.

Retail Operations | Family Wine Shop | 2022 - Present

- Support customer service, product handling, stock organization and daily store operations, developing commercial awareness, communication and ownership.
